

(Senior) Medical Affairs Manager f/m/d

Adrenomed is a highly innovative biopharmaceutical company based in the Berlin area. It is specialized in preserving vascular integrity in life-threatening conditions and is committed to precision medicine. The main focus is on sepsis and septic shock.

Currently, we have completed a Phase 2 trial in septic shock and are planning to start a pivotal trial with a subsequent market authorization.

We would never have come this far without our enthusiastic, creative, and highly motivated colleagues who are willing to grow and work in a dynamic environment. Exactly these colleagues are ready to welcome you to the team and support you from day one. We offer flat hierarchies and the opportunity to directly contribute to the development of the company while also providing competitive salaries.

To expand our team we look for a **(Senior) Medical Affairs Manager**

Your Responsibilities

- Maintaining contact to key opinion leaders and external experts in the medical context
- Continuous literature search and medical-scientific evaluation related to the therapeutic area
- Responding to medical enquiries on the drug under development from third parties (pharma partners, investors, authorities, healthcare professionals etc.)
- Ensuring governance and compliance requirements for the projects
- Maximal medical support of clinical study concepts
- Contribution to the preparation and maintenance of study-relevant documents (Investigator Brochure, Investigator Medicinal Product Dossier, study protocols, etc.)
- Contribution in the preparation of medical-scientific statements for health policy activities in the context of market access/pricing & reimbursement
- Support drug safety/ pharmacovigilance requirements and activities

Your Profile

- Successfully completed studies in medicine (preferred) or pharmacy, biology, chemistry, biochemistry, or equivalent life sciences studies
- At least 3 years of professional experience in mainly Medical Affairs as well as in Clinical Research & Development, Market Access, Pharmacovigilance/Drug Safety or Medical Information
- Practical experience within the pharmaceutical or biotech industry
- Quick perception and pragmatic solution orientation with a pronounced hands-on mentality
- Careful and reliable way of working
- Fluent in written and spoken German and English round off the package

Our commitments to you

- Opportunity to take part in development of a 1st in class molecule that may change treatment options in life-threatening conditions, e.g. sepsis
- Innovative and international environment
- Flat hierarchies & fast decision times
- Highly motivated team
- Fair and competitive salary
- Good connection to Berlin's public transport
- Up to 3 days of remote work per week

If you like this role and think that you would be a suitable candidate, don't hesitate!
Send us an application and CV to career@adrenomed.com.
